	2B	● ●	8
	4B	● ●	8

- blister of 4 (also contains 1 x 8B Watersoluble Sketching pencil)
- tin of 6 (contains 2 x HB, 2 x 2B, 2 x 4B and free pencil sharpener)

LF - Lightfastness rating

Lightfastness refers to the chemical stability of a pigment under long exposure to light. Light can cause colour to whiten, darken, fade or completely disappear.

The Blue Wool Scale - two pieces of blue wool are used to test lightfastness. One is placed in the dark and the other in the equivalent of sunlight for a period of three months. After three months the two pieces of wool are compared and rated between 0 – 8. 8 is the highest rating and values of 6 or higher are considered to be lightfast.
